

MPN

NORMAL PRIMING MAGNETIC DRIVE CENTRIFUGAL PUMPS PVDF OR PP

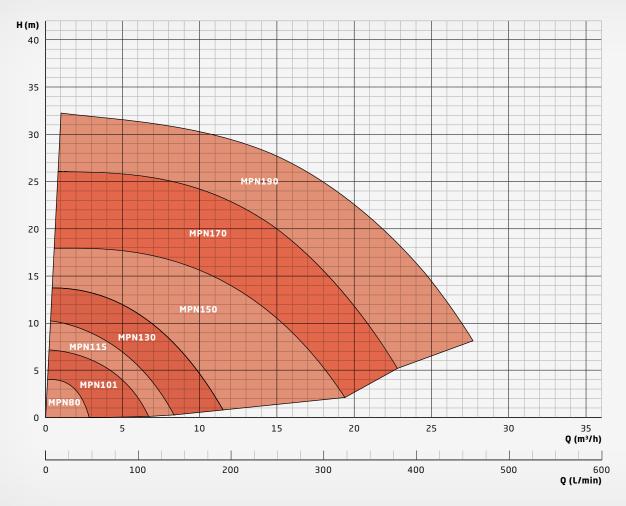

Housing and impeller materials: PVDF, PP

Elastomers: EPDM, FKM (e.g. Viton®), FEP, FFKM (e.g. Kalrez®)

Bushing materials: PTFE-GF, Al₂O₃-ceramics, SiC (silicon carbide), graphite carbon

The MPN series is one of the most proven plastic magnetic drive pumps in the industry. Having been continuously improved over the decades, there are some ten thousand MPN pumps in use worldwide. The MPN series features a contact- and abrasion-free magnetic drive system, so that no mechanical seal is required to seal the pump.

PERFORMANCE CHART

Advantages:

- + Hermetically sealed and absolutely leak-free (no mechanical seal)
- + Particularly suited for toxic, environmentally harmful and corrosive media
- + Runs in partial dry run conditions due to large diameter slide bearings

Solid particles up to 3 mm in size and 10% volume are allowed. The maximum viscosity is 150 mPas; the maximum allowed temperature is 95°C. All sizes are also available in ATEX-certified versions under the name MPN-EX for ATEX zones 1 and 2.

DESCRIPTION

Characteristics | Chemical-resistant, single-stage, magnetic drive centrifugal pump

Features

- · Hermetically sealed and absolutely leak-free (no mechanical seal)
- · Powerful magnetic drive with neodymium magnets
- · Practically maintenance-free in normal operation due to extra-large slide bearings
- · Runs in partial dry run conditions due to large diameter PTFE slide bearings
- design without impeller shaft
- · All wet parts made of high-quality, corrosion-resistant plastics (PVDF or PP)
- · Threaded connections (ISO 228-1) as standard
- · Optionally available with flanges (from size 130)
- · Universally applicable, low-noise and compact close-coupled design
- · Approved for use in explosive atmospheres ATEX zones 1 and 2
- · Optionally available with housing parts made of conductive plastic with approval for ATEX zone 1
- · Corrosion-resistant paint finish
- · All stainless steel screws in 1.4571 (316Ti)
- · FDA-certified materials (PVDF versions)

Fields of application

Delivery of acids, bases, lye or other corrosive, harmful or toxic liquids in such applications, where even small leakages are not acceptable and a hermetically sealed pump is required.

Delivery of highly pure and sensitive liquids, where contamination must absolutely be avoided.

For example in the following applications:

- · Plating and surface coating
- · Semiconductor technology and solar cell production
- · PCB and electronics manufacturing
- · Wastewater and fresh water treatment
- · Laboratory equipment and medical technology,
- · Emission controls and gas scrubbers
- · Battery production and energy storage
- · High-purity applications, demineralized water, ultrapure water

TYPES

Characteristics

- · Pump housing / wet end: PVDF, PP
- · Elastomers: FKM, EPDM, FEP, FFKM
- · Material of slide bearings: PTFE/Al₂O₃, SiC/SiC

Standard motors (available from stock)

- \cdot Three-phase motors: D230 / Y400 V-3ph @ 50 Hz, D277 / Y480 V-3ph @ 60 Hz, IP 55, Ins.-Cl. F, also with PTC
- · All motors from 0.75 kW have energy efficiency class IE3
- · Single-phase motors (up to 1.1 kW: 230 V-1ph, 50 / 60 Hz, IP 55, Isol.-Kl. F)
- · ATEX-certified motors (temperature rating T3)

Special motors

(available on request, for example)

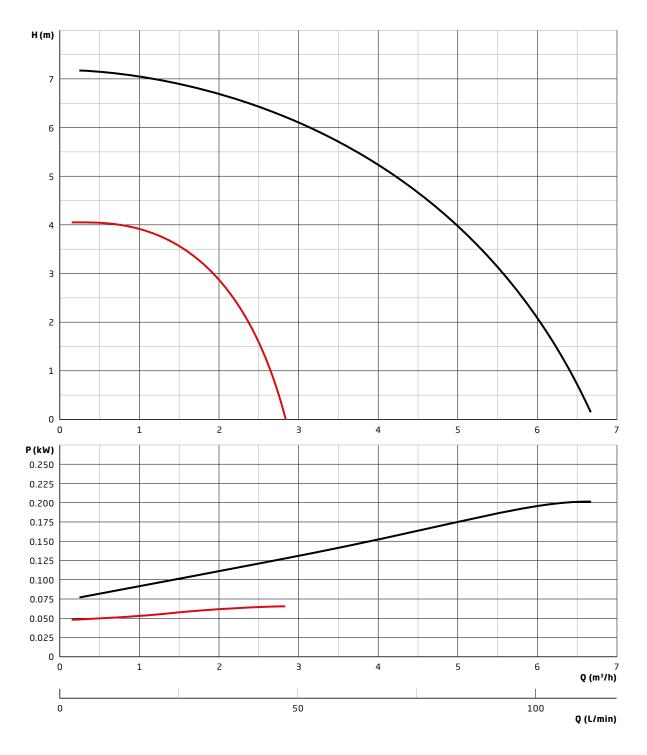

- · Special voltages and frequencies
- · ATEX-certified motors (temperature rating T4)
- · Three-phase motors with integrated drive / frequency converter
- · Four-pole motors with 1450 rpm @ 50 Hz / 1650 rpm @ 60 Hz
- · UL- and CSA-certified motors
- · Special types of protection, e.g. IP 65
- · Special insulation classes, e.g. tropical insulation
- · Multi-voltage, e.g. D220-290/Y380-500 V, 50 Hz; D220-332/Y380-575 V, 60 Hz
- · Direct-current motors (DC or BLDC)

Operating conditions

- · Max. flow rate: up to 35 m³/h
- · Max. delivery head: up to 32 m
- · Liquid temperature: -5 to 95°C (PVDF), resp. 0 to 80°C (PP)
- · Ambient temperature: -10 to 40°C, higher temperatures on request
- · Pumps can be adapted to high-density liquids (up to 2.0)
- \cdot Depending on operating conditions and pump model, MPN pumps can run dry for certain amounts of time up to several hours

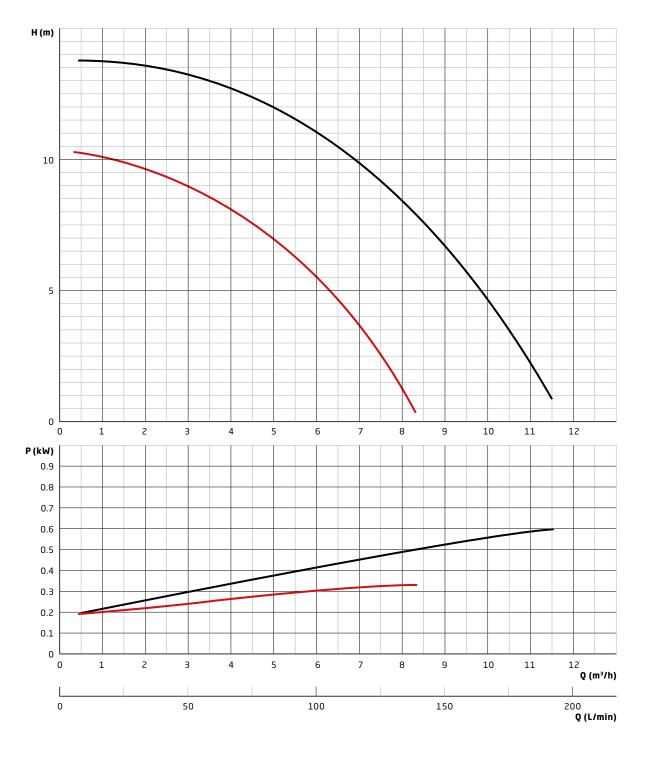

PERFORMANCE CURVE MPN 80 (0.18 kw) / MPN 101 (0.18 kw)

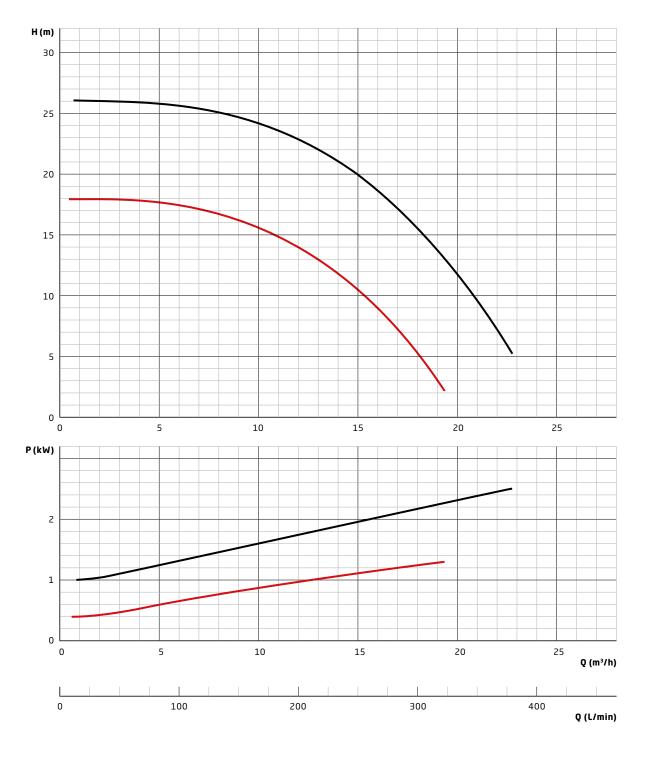

PERFORMANCE CURVE MPN 115 (0.25 kw) / MPN 130 (0.55 kw)

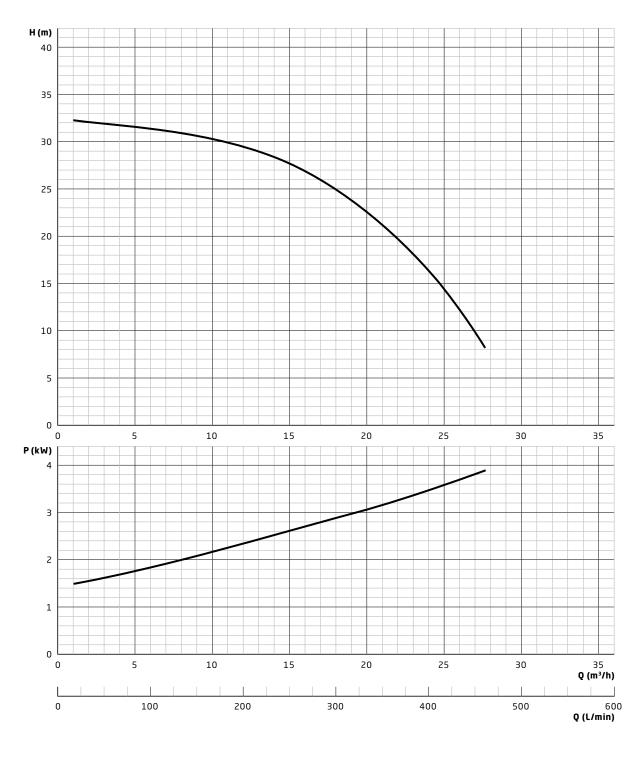

PERFORMANCE CURVE MPN 150 (1.1 kw) / MPN 170 (2.2 kw)

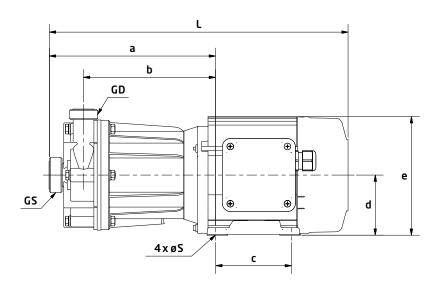

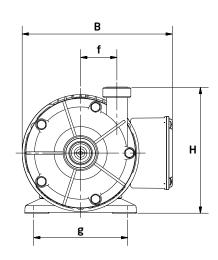

PERFORMANCE CURVE MPN 190 (3.0/4.0 kW)

FITTINGS

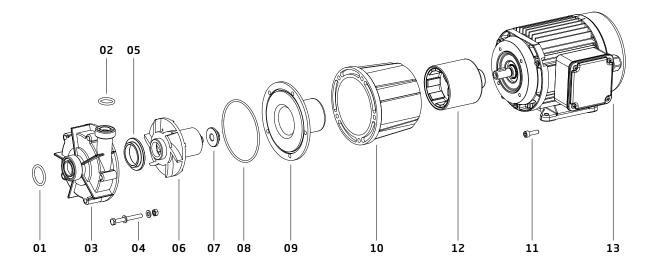

SCHMITT offers an extensive range of fittings to facilitate the installation of the pump into your system:

- · flange adaptors
- $\cdot \ \text{hose connectors}$
- · welding connectors for stainless steel pipes
- · reducers

- · NPT threaded adaptors
- \cdot inlet strainers for vertical pumps
- · extension pipes for vertical pumps

SPARE PARTS LIST

Position	Description	Available materials
01	O-ring (inlet port)	FKM, EPDM, FEP, FFKM
02	O-ring (outlet port)	FKM, EPDM, FEP, FFKM
03	Pump housing incl. slide bearing ring	Housing: PVDF, PP Ring: Ceramics Al₂O₃, SiC
04	Hexagon bolt, washer, nut	V4A (1.4571)
05	Front bearing	PTFE, SIC
06	Impeller	PVDF, PP
07	Back bearing	PTFE, SIC
08	Housing seal	FKM, EPDM, FEP, FFKM
09	Backplate incl. slide bearing ring	Housing: PVDF, PP Ring: Ceramics Al ₂ O ₃ , SiC
10	Flange	PP, aluminium
11	Cylinder bolt	V4A (1.4571)
12	Drive magnet	
13	Motor
